Site Assessment Framework for HOUSING¹

Site details	
Reference Number	ALP027
Site Name	Former Pig Unit
Site Address	Hitchin Road, Fairfied Park
Settlement	Fairfield
Size	Submitted Developable Area:5.55ha
	Submitted Whole Site Area: 5.55ha
	Measured GIS Area:5.55ha
Proposed Use	Care Home
Any other	
information	

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

OTAO						
	E 1A ASSESSMENT					
	This stage of the assessment rules out sites that are too small or conflict with national policy designations.					
Provi	sional Site Capacity	1				
1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards • Up to 0.4 hectare 100% • 0.4 to 2 hectares 80% • 2 hectares or above 60% Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.	No	Number of proposed dwellings as per proforma: 116 Number of proposed dwellings as per CBC methodology: 99			
Flood	I Risk (All sites which reach Stage 2 will be subject to the	ne Seque	ntial Test)			
2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within flood zone 2 or 3			
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk form surface water flooding			
Natio	nally significant designations (All sites which reach S	tage 2 b	e subject to detailed assessment)			
4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.			
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB			
Does	the site continue to next stage?	• •	Yes			

Page **J**

¹ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more².

Relationship to Settlement				
6	For sites that are not of a sufficient scale to be self- contained, is the site a logical extension to the settlement or are there any major physical constraints(for example A roads, rivers or railways) that separate it from the main settlement?	A	The site would result in development on the eastern side of Hitchin Road, which is not a logical extension to Fairfield.	
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence	
Does	Does the site continue to next stage?		Yes	

STAGE 1C ASSESSMENT This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs³. Critical Infrastructure 8 Can the site meet the critical infrastructure needs⁴? 8 Can the site meet the critical infrastructure needs⁴? 9 A Further information required 10 Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability What is the existing use of the site? 9 G Vacant site Would the existing use limit the development potential? Is the land controlled by a developer or land owner 10 G Land controlled by land owner who has expressed an intention to develop the site? intent on developing the site. 11 Are there any legal or ownership problems that could G No known legal or ownership delay or prevent development? problems. If Yes, then can these be issues be realistically overcome? 12 Does the site already have planning permission for R Site has planning permission. the proposed use? If yes, then score as Red because it's not eligible for allocation.

age

² The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led garden villages towns and cities.pdf)

³ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁴ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

No

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAG	E 1A ASSESSMENT				
	This stage of the assessment rules out sites that are too small or conflict with national policy designations.				
	Provisional Site Capacity				
1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards • Up to 0.4 hectare 100% • 0.4 to 2 hectares 80% • 2 hectares or above 60% Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.	No	Number of proposed dwellings as per proforma: 18 Number of proposed dwellings as per CBC methodology: 20		
Flood	Risk (All sites which reach Stage 2 will be subject to th	ne Seque	ntial Test)		
2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Not in flood zone 2 or 3		
3	Is more than 50% of the site at risk from surface water flooding?	No	Not at risk from surface water flooding		
Natio	nally significant designations (All sites which reach S	tage 2 be	e subject to detailed assessment)		
4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	Not in a designation area		
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not in an AONB		
Does	Does the site continue to next stage? Yes				

Page **O**

⁵ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more⁶.

Relat	Relationship to Settlement			
6	For sites that are not of a sufficient scale to be self- contained, is the site a logical extension to the settlement or are there any major physical constraints(for example A roads, rivers or railways) that separate it from the main settlement?	G	Relates well to Fairfield – no major physical constraints identified	
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence identified	
Does	the site continue to next stage?	•	Yes	
Does	the site continue to next stage?		Yes	

STAGE 1C ASSESSMENT This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs⁷. Critical Infrastructure 8 Can the site meet the critical infrastructure G None apparent 8 Can the site meet the critical infrastructure G None apparent 9 Does the site continue to next stage? Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability What is the existing use of the site? 9 G vacant land associated with former Would the existing use limit the development hospital uses potential? 10 Is the land controlled by a developer or land owner G Agent representing client who has expressed an intention to develop the site? 11 Are there any legal or ownership problems that could G None apparent delay or prevent development? If Yes, then can these be issues be realistically overcome? 12 Does the site already have planning permission for R CB/15/04320/OUT the proposed use? If yes, then score as Red because it's not eligible for allocation.

age

⁶ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led garden villages towns and cities.pdf)

⁷ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁸ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

⁹ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more¹⁰

Relationship to Settlement			
6	For sites that are not of a sufficient scale to be self- contained, is the site a logical extension to the settlement or are there any major physical constraints(for example A roads, rivers or railways) that separate it from the main settlement?	A	Site is physically constrained from the main settlement by Hitchin Road. However, there is planning permission for development on this side of the road (former pig unit)
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does	Does the site continue to next stage?		Yes

STAGE 1C ASSESSMENT

This s	This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs ¹¹ .				
Critical Infrastructure					
8	Can the site meet the critical infrastructure	G	No critical infrastructure to be		
	requirements that will enable delivery ¹² ? provided.				
Does	Does the site continue to next stage? Yes				

Does the site continue to next stage?

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

Availe	ability		
9	What is the existing use of the site? Would the existing use limit the development potential?	G	Greenfield
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land owner intent on developing the site.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	No known legal or ownership problems.
12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	R	Planning permission granted for mixed use development (16/011455)

¹⁰ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locallyled garden villages towns and cities.pdf)

¹¹ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.
