Site Assessment Framework for HOUSING¹

Site details	
Reference Number	ALP210
Site Name	Land at Shefford Road
Site Address	Land at Shefford Road
Settlement	Meppershall
Size	Submitted Developable Area: 0.77ha Submitted Whole Site Area: 0.77ha Measured GIS Area: 0.80ha
Proposed Use	residential
Any other information	CB/15/04157 planning permission granted on part of the site for 6 dwellings. 5yr Hsg Land Supply reasons.

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma:
			15-20
			Number of proposed dwellings as per CBC methodology:
			19

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

¹ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more².

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site falls outside the settlement envelope of Meppershall to the north of the village. The area to the north of Meppershall is characterised by development along the road frontage. It is considered that the proposal could be a logical extension as it would be infill between the settlement envelope adjoining the site.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs³.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ⁴ ?	G	No obvious infrastructure requirements
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Greenfield site
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by land owners intent on delivering the site

² The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

³ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁴ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	There are no legal or ownership problems
12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	A	Part of the site has planning permission for 6 dwellings
Does the site continue to next stage?			Yes

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ⁵	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

⁵ Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

Previously Developed Land

16	Is the site Previously Developed Land in accordance with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 	R	Greenfield site
-----------	--	---	-----------------

Community

17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	No Neighbourhood Planning designation
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	No known community consultation
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	There would be no impact on sustainability of the settlement.

Cumulative Impact

20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	Homes 2006: 655 Homes 2016: 698 There has been a 6.56% increase in new homes in Mepperhall
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There is outstanding planning permission for 3 dwellings; representing a 0.45% increase.

Physical Constraints

22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	G	There are no physical constraints
-----------	--	---	-----------------------------------

Relationship to Settlement

23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive	G	The site would not have an adverse impact on the character of the built environment. There is development
-----------	---	---	---

	characteristics of the settlement's built or natural form?		along both sides of Shefford Road
Agricultural Land Quality			
24	<p>Would the development impact on high quality agricultural land?</p> <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) • 50% or more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 	R	Grade 2

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	<p>Facilities and services</p> <p>Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit.</p> <p>Issues relating to capacity are assessed separately</p>		
25a	<p>Does the settlement have a Primary/Lower school?</p> <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	Meppershall Lower School
25b	<p>Does the settlement have a Middle school (if applicable)?</p> <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25c	<p>Does the settlement have a Secondary/ Upper school?</p> <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	<p>Does the settlement have a GPs surgery or medical centre?</p> <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	<p>What retail provision does the settlement offer?</p> <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Convenience store/post office
27	<p>Distance to bus stops with a frequent service (at least hourly at peak times):</p> <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) 	G	Adj to orchard Close

	<ul style="list-style-type: none"> OR submission form stated that improved public transport facilities could be provided as part of the development (G) 		
28	Distance to nearest train station: <ul style="list-style-type: none"> Less than 800m (G) 800m-1200m (A) Over 1200m (R) 	R	Nearest train station Arlesey
29	Is the site accessible from the existing road network?	G	Site appears accessible from existing road network
School Capacity			
30	Do the local schools have capacity at all tiers?	G	Small amount of spare capacity at Meppershall Lower School. Middle and upper projects are planned within the education planning area – financial contributions would be requested.
31	If not, has a commitment been made to address this?	G	See above
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	What is the conclusion of the sequential approach to site allocations, in regards to flood risk? <ul style="list-style-type: none"> No assessment required (G) Consider Further Assessment (A) Further Assessment Required (R) 	G	Site is at limited risk of surface water flooding, assessment is unlikely to be required
Environmental Health			
34	Contamination Are there any contamination constraints on site and will there be any remediation required?	R/A/G	Awaiting comments
35	Adjoining uses Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)	R/A/G	Awaiting comments
Environmental Constraints			
36	Landscape character	A	appropriate landscape mitigation

	What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?		required, development set back from elevated exposed northwest, need to maintain green landscaped edge to High Street frontage.
37	Heritage/ Archaeology What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of these assets?	G	Site is considered to have low archaeological potential. No objection to allocation. Heritage OK
38	Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?	G	Rough grassland, opportunities for enhancement possible impact for farmland species
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	G	Parish GI plan identifies aspiration to create a cycleway alongside the road to Shefford – could be integrated within development.
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	G	No issues
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		Part of the site has planning permission
Does the site continue to next stage?			Yes

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

Site is to be considered for further considerations.

- **There are no known physical constraints to development.**
- **Appropriate landscape mitigation will be required to reduce the impact on the landscape.**
- **The site would not have an adverse impact on the character of the built environment and could be an extension to Meppershall.**

STAGE 3 : ACHIEVABILITY

This section assesses whether the site is Achievable in line with NPPG Guidance:

A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site, and the capacity of the developer to complete and let or sell the development over a certain period.

Viability

43	Referring to the Viability Assessment undertaken by consultants, is the probability of the site being viable high, medium or low? <ul style="list-style-type: none"> • High (G) Benchmark land value comfortably exceeded by likely residual value • Low (A) Marginal viability, with likely residual land value close to benchmark land value • Very Low (R) Likely residual value well below benchmark land value 	G	The Council's Residential Development Viability Report (Feb 2017) indicates that residual value of development in this value area and at this scale would exceed both the upper and lower benchmark land values and as such the report indicates that such development would likely be viable.
----	--	---	--

Achievability		
44	Are there any market factors which would affect deliverability?	<p>The Council's Residential Development Viability Report (Feb 2017) is based upon residential property figures between 2013 and 2016. The housing market within Central Bedfordshire has seen significant increases in residential property values in a relatively short period of time, whereby it is considered that the viability of developments within this report has been cautious. For example in 2016 Dunstable has benefited from a 17.9% housing price increase with an average annual house price increase in 2016 for housing within Central Bedfordshire of 10.74%.</p> <p>This increase in property value has been a result of not only national trends in house prices and existing transport links to economically successful areas but also significant infrastructure projects within the pipeline including: East-West Rail; M1-A5 link road; A421 upgrades; Oxford to Cambridge Express Way; Luton and Dunstable Guided Busway; M1 improvements; and potential A1 improvements. It is considered that as such infrastructure projects progress that property prices within the Local Authority will likely continue to increase which has and will increase viability/deliverability of development not only in the higher value areas but also the lower value areas of the Authority.</p>
45	<p>When can the scheme realistically commence delivery?</p> <ul style="list-style-type: none"> • 0 to 5 years (deliverable) • 6 to 10 years • 11 to 15 years • 15 to 20 years • Outside Plan Period 	0 to 5 years
46	What is the indicative build out time of the site?	The Case Study Sites outlined within the Council's Residential Development Viability Report (Feb 2017) indicates that after the site has received detailed planning permission a single housebuilder would likely take one year to build out this site.
Does the site pass this stage?		Yes

SUMMARY

The sites that pass through this assessment process will not automatically be allocated for development in the Local Plan.

Sites will be selected with reference to a number of other factors including:

- The strategy, vision and objectives proposed in the draft plan
- Technical evidence studies
- The sustainability appraisal process
- The results of public consultation
- Flood Risk Sequential Approach
- Further transport modelling
- Consultation with neighbouring authorities

DRAFT

Site Assessment Framework for HOUSING⁶

Site details	
Reference Number	ALP211
Site Name	
Site Address	Land to rear of Stocken House 59 Shefford Road Meppershall
Settlement	Meppershall
Size	Submitted Developable Area: 7.68ha Submitted Whole Site Area: 7.68ha Measured GIS Area: 7.68ha
Proposed Use	Housing
Any other information	To include a sports ground large enough to provide a football pitch and tennis court, plus a pavilion. If required, land could be provided for other identified community uses or employment uses, ie B1 starter units. See NLP095

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma: 100
			Number of proposed dwellings as per CBC methodology: 138

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not in Flood Zone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Not at risk from surface water flooding.

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not in AONB
Does the site continue to next stage?			Yes

⁶ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more⁷.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site is a logical extension to the settlement.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs⁸.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ⁹ ?	A	Further information required
Does the site continue to next stage?			yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Paddock land
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by a land owner intent on developing the site.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	No legal or ownership problems.
12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	G	No planning history.
Does the site continue to next stage?			Yes

⁷ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

⁸ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁹ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) <p>Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*</p>	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ¹⁰	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

Previously Developed Land

16	Is the site Previously Developed Land in accordance with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) • 26 - 75% (A) 	R	Greenfield
-----------	--	---	------------

¹⁰ Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

	<ul style="list-style-type: none"> • 25% - 0% (Greenfield) (R) 		
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	NA
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	No known community consultation
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	No impact on sustainability
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	There has been a 6.56% increase in new homes from 2006 to 2016.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There will be an additional 0.43% increase in new homes with outstanding planning permissions.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	G	There are no known physical constraints.
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	G	Will extend development beyond the road frontage, but there is an allocated site to the south extending the envelope already.
Agricultural Land Quality			
24	Would the development impact on high quality agricultural land? <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) • 50% of more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 	A	Grade 3

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	In settlement
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Post office
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) • OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	G	339m
28	Distance to nearest train station: <ul style="list-style-type: none"> • Less than 800m (G) • 800m-1200m (A) • Over 1200m (R) 	R	Over 1200m
29	Is the site accessible from the existing road network?	G	Shefford Road
School Capacity			

30	Do the local schools have capacity at all tiers?	A	Not much lower school capacity to manage additional homes, middle and upper schools already over capacity
31	If not, has a commitment been made to address this?	A	Lower school contributions likely to be required, plans are in place to expand middle and upper school places in the area.
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	What is the conclusion of the sequential approach to site allocations, in regards to flood risk? <ul style="list-style-type: none"> No assessment required (G) Consider Further Assessment (A) Further Assessment Required (R) 	G	Site is at limited risk of surface water flooding, assessment is unlikely to be required
Environmental Health			
34	Contamination Are there any contamination constraints on site and will there be any remediation required?	R/A/G	Awaiting comments
35	Adjoining uses Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)	G	Possible noise from plant/odour from neighbouring commercial care home
Environmental Constraints			
36	Landscape character What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?	R/A	Some capacity if limited scale and set with strong mitigation to north and west and hedgerow frontage conserved.
37	Heritage/ Archaeology What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of these assets?	A	Site has multi-period archaeological potential but this would not prevent allocation providing appropriate mitigation is undertaken.
38	Ecological Assets What would the impacts of development be on any	A	Some development along road corridor would be acceptable. Adj

	biological, geological or ecological assets and are there any opportunities for their enhancement?		to Nunnswood CWS and important GI for village
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	G	Limited aspirations from PGIP – seeking to create a cycle route along road to Shefford. Not identified as part of GI network at Mid Beds GI plan level. Would need to buffer adjacent Nunnswood. No loss of LS open space.
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	G	No issues
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		No relevant planning history
Does the site continue to next stage?			Yes

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

The site is to be considered further for assessment.

- The site forms an extension to the north west of the settlement.
- There are no physical or primary constraints to development on the site.
- Although Meppershall does not provide a wide range of services, the adjoining settlements provide these.
- In terms of environmental constraints, those identified can be mitigated, such as landscape and boundary with Nunnswood. The hedgerow frontage needs to be conserved with strong mitigation to the north and west of the site.
- Mitigation may be required for the adjoining use.

STAGE 3 : ACHIEVABILITY

This section assesses whether the site is Achievable in line with NPPG Guidance:

A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site, and the capacity of the developer to complete and let or sell the development over a certain period.

Viability

43	Referring to the Viability Assessment undertaken by consultants, is the probability of the site being viable high, medium or low? <ul style="list-style-type: none"> • High (G) Benchmark land value comfortably exceeded by likely residual value • Low (A) Marginal viability, with likely residual land value close to benchmark land value • Very Low (R) Likely residual value well below benchmark land value 	G	The Council's Residential Development Viability Report (Feb 2017) indicates that residual value of development in this value area and at this scale would exceed both the upper and lower benchmark land values and as such the report indicates that such development would likely be viable.
-----------	--	---	--

Achievability

44	Are there any market factors which would affect deliverability?		No known factors affecting deliverability. The Council's Residential
-----------	---	--	---

		<p>Development Viability Report (Feb 2017) is based upon residential property figures between 2013 and 2016. The housing market within Central Bedfordshire has seen significant increases in residential property values in a relatively short period of time, whereby it is considered that the viability of developments within this report has been cautious. For example in 2016 Dunstable has benefited from a 17.9% housing price increase with an average annual house price increase in 2016 for housing within Central Bedfordshire of 10.74%.</p> <p>This increase in property value has been a result of not only national trends in house prices and existing transport links to economically successful areas but also significant infrastructure projects within the pipeline including: East-West Rail; M1-A5 link road; A421 upgrades; Oxford to Cambridge Express Way; Luton and Dunstable Guided Busway; M1 improvements; and potential A1 improvements. It is considered that as such infrastructure projects progress that property prices within the Local Authority will likely continue to increase which has and will increase viability/deliverability of development not only in the higher value areas but also the lower value areas of the Authority.</p>
45	<p>When can the scheme realistically commence delivery?</p> <ul style="list-style-type: none"> • 0 to 5 years (deliverable) • 6 to 10 years • 11 to 15 years • 15 to 20 years • Outside Plan Period 	<p>Unknown</p> <p>0 to 5 years</p>
46	<p>What is the indicative build out time of the site?</p>	<p>To be delivered within 3 years.</p> <p>The Case Study Sites outlined within the Council's Residential Development Viability Report (Feb 2017) indicates that after the site has received detailed planning permission a single housebuilder would likely take one year to first completion and would build out the site at a rate of 50 dwellings per annum there after.</p>

Does the site pass this stage?	Yes
--------------------------------	-----

SUMMARY

The sites that pass through this assessment process will not automatically be allocated for development in the Local Plan.

Sites will be selected with reference to a number of other factors including:

- The strategy, vision and objectives proposed in the draft plan
- Technical evidence studies
- The sustainability appraisal process
- The results of public consultation
- Flood Risk Sequential Approach
- Further transport modelling
- Consultation with neighbouring authorities

DRAFT

Site Assessment Framework for HOUSING¹¹

Site details	
Reference Number	ALP280
Site Name	St Marys Well Meadow
Site Address	Land between St Mary's Church and Shillington Road
Settlement	Meppershall
Size	Submitted Developable Area: 2.33ha Submitted Whole Site Area: 2.33ha Measured GIS Area: 2.32ha
Proposed Use	Residential and community facilities
Any other information	

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma: 15-40 Number of proposed dwellings as per CBC methodology: 40
---	--	----	--

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site. Adjacent SAM
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

¹¹ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more¹².

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints(for example A roads, rivers or railways) that separate it from the main settlement?	R	Although the site adjoins the settlement envelope, this area to the south of the village is adjacent to the listed church there is no other built development here. It is therefore considered this proposal would not form a logical extension to Meppershall. Furthermore, the settlement pattern has historically been defined by the former castle and church being located to the south of the core of the village. Open views across the meadow to these historic assets have been retained to the south from Shillington/Meppershall Road. Development in this location would have an adverse impact on the historic unique and distinctive characteristics of the built and natural form of the settlement.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			No

¹² The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

Site Assessment Framework for HOUSING¹³

Site details	
Reference Number	ALP281
Site Name	Land at 4 High Street
Site Address	Land at 4 High Street
Settlement	Meppershall
Size	Submitted Developable Area: 0.33ha Submitted Whole Site Area: 0.33ha Measured GIS Area: 0.33ha
Proposed Use	residential
Any other information	Requires relocation of the part business use

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	Yes	Number of proposed dwellings as per proforma:
			15
			Number of proposed dwellings as per CBC methodology:
			8

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			No

¹³ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

Site Assessment Framework for HOUSING¹⁴

Site details	
Reference Number	ALP373
Site Name	Land at Shefford Road
Site Address	Land at Shefford Road
Settlement	Meppershall
Size	Submitted Developable Area: 0.60ha Submitted Whole Site Area: 1ha Measured GIS Area: 1.4ha
Proposed Use	Residential
Any other information	The originally promoted site comprises 4 separate land parcels – this assessment considers the larger site to the north which is the only site that would provide for 10 or more dwellings

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma: 25-30
			Number of proposed dwellings as per CBC methodology: 15

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk of surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

¹⁴ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more¹⁵.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site to the north is a logical extension of Meppershall. The other parcels are located in Meppershall.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs¹⁶.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ¹⁷ ?	A	Further information required
Does the site continue to next stage?			yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Vacant
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land owner intent on developing the sites.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	No known legal or ownership problems.
12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	G	NA

¹⁵ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

¹⁶ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

¹⁷ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

Does the site continue to next stage?	Yes
---------------------------------------	-----

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Site not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ¹⁸	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

Previously Developed Land

16	Is the site Previously Developed Land in accordance with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) 	R	Greenfield
-----------	--	---	------------

¹⁸ Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

	<ul style="list-style-type: none"> • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 		
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	No NP
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	NA
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	No loss of services and facilities
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	There has been a 6.56% increase in new homes since 2006.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There will be an additional 0.43% increase in new homes with outstanding planning permission.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	G	No known physical constraints.
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	G	The site would extend the village northwards along Shefford Road. There is development on the opposite side of Shefford Road.
Agricultural Land Quality			
24	Would the development impact on high quality agricultural land? <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) • 50% or more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 	R	Grade 2

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	In settlement
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Limited provision
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) • OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	A	628m
28	Distance to nearest train station: <ul style="list-style-type: none"> • Less than 800m (G) • 800m-1200m (A) • Over 1200m (R) 	R	Over 1200m
29	Is the site accessible from the existing road network?	G	Shefford Road

School Capacity			
30	Do the local schools have capacity at all tiers?	A/R	Small amount of spare capacity at Meppershall Lower School. Middle and upper projects are planned within the education planning area – financial contributions would be requested. The number of sites in Meppershall is a concern as the existing lower school would not be able to accommodate all development without expansion, requiring additional land for the existing school site, or a new school site.
31	If not, has a commitment been made to address this?	A	See above comment
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	What is the conclusion of the sequential approach to site allocations, in regards to flood risk? <ul style="list-style-type: none"> No assessment required (G) Consider Further Assessment (A) Further Assessment Required (R) 	G	Site is at limited risk of surface water flooding, assessment is unlikely to be required
Environmental Health			
34	Contamination Are there any contamination constraints on site and will there be any remediation required?	R/A/G	Awaiting comments
35	Adjoining uses Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)	R/A/G	Awaiting comments
Environmental Constraints			
36	Landscape character What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?	R	Unsuitable for development – open landscape in elevated position forming rural setting to village.

37	Heritage/ Archaeology What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of these assets?	G	Heritage: No historic built environment issues identified. No objection Archaeology: These sites are considered to have low archaeological potential and therefore the Archaeology Team would have no objection to its allocation.
38	Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?	R	Areas of scrub / woodland, difficult to demonstrate net gain
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	R/A	Parish GI plan identifies aspiration to create a cycleway along to road to Shefford – could be delivered through development. Current site appears well wooded, development would destroy existing woodland. Adjacent to RoW on northern edge.
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	R/A/G	Awaiting comments
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		No relevant history
Does the site continue to next stage?			No

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

The site is not to be considered further.

- It is considered that it will have an adverse impact on the landscape due to its elevated position forming a rural setting to the village.
- There is also concern regarding ecology in that it would be difficult to demonstrate a net gain.
- The site could form a logical extension to Meppershall.

Site Assessment Framework for HOUSING¹⁹

Site details	
Reference Number	ALP473
Site Name	New Close Nurseries
Site Address	New Close Nurseries, 67 Fildyke Road
Settlement	Meppershall
Size	Submitted Developable Area: 0.51ha Submitted Whole Site Area: 0.51ha Measured GIS Area: 0.51ha
Proposed Use	residential
Any other information	See NLP050 – part of site has planning permission 9 dwellings 16/03278

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma:
			10
			Number of proposed dwellings as per CBC methodology:
			12

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

¹⁹ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more²⁰.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site falls outside the settlement envelope of Meppershall on the east. There are no major physical constraints that separate it from Meppershall. It is considered that it could be a potential extension to the village.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs²¹.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ²² ?	G	No critical infrastructure required.
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Greenfield site. Demolition of glasshouses required.
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by land owners intent on developing the site.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	There are no legal or ownership problems reported
12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	R	CB/16/03278 for 9 dwellings approved
Does the site continue to next stage?			No

²⁰ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

²¹ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

²² This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

			Number of proposed dwellings as per CBC methodology: 28

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

²³ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more²⁴.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site falls outside the settlement envelope of Meppershall on the southern edge. As there is development on both sides of the road, it is considered that the site could form a logical extension to the village.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs²⁵.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ²⁶ ?	A	Further information required
Does the site continue to next stage?			yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Greenfield site with glasshouses
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	R	Unknown. Insufficient information.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically	R	Unknown further details required for site to be considered available and deliverable

²⁴ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. Site Assessment Framework for HOUSING³¹

Site details	
Reference Number	NLP060
Site Name	100 High Street
Site Address	100 High Street
Settlement	Meppershall
Size	Submitted Developable Area: 1.6ha Submitted Whole Site Area: 1.6ha Measured GIS Area: 1.6ha
Proposed Use	residential
Any other information	Application CB/16/01012 refused – partly due to settlement envelope but also proximity to grain dryer – noise. If fails on noise then NLP313 must fail too. Need to keep a check on any planning appeal.

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma: 38 Number of proposed dwellings as per CBC methodology: 38
----------	--	----	---

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

³¹ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more³².

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	A	The site lies to the rear of 100 High Street. Although there is no backland development on the western side of Shefford Road, there is backland development on the eastern side.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs³³.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ³⁴ ?	G	Limited critical infrastructure requirements
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Demolition of existing structures on site. Site vacant.
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by land owner intent on developing the site. The land is subject to a promotion agreement.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically	G	No legal or ownership problems suggested on application

³² The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

³³ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

³⁴ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

	overcome?		
12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	A	Application CB/16/01012 refused 29/11/2016
Does the site continue to next stage?			Yes

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Site not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ³⁵	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

³⁵ Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

Previously Developed Land			
16	Is the site Previously Developed Land in accordance with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 	G	Brownfield land, in use for employment purposes
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	No known community consultation
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	No impact on sustainability
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	No impact on sustainability
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	Homes 2006: 655 Homes 2016: 698 There has been a 6.56% increase in new homes in Meppershall.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There is outstanding planning permission for 3 dwellings; representing a 0.45% increase.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	A	There is a grain dryer on the farm adjacent that may be constraint to development.
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	A	Although no backland development on the western side of Shefford Road, there is backland development on the eastern side.
Agricultural Land Quality			
24	Would the development impact on high quality	R	Grade 2

	agricultural land? <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) • 50% of more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 		
--	---	--	--

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	Meppershall lower School
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Limited provision
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) • OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	R	Over 800m opp village hall
28	Distance to nearest train station:	R	Nearest train station Arlesey

	<ul style="list-style-type: none"> • Less than 800m (G) • 800m-1200m (A) • Over 1200m (R) 		
29	Is the site accessible from the existing road network?	A	Requires the demolition of a house on the frontage.
School Capacity			
30	Do the local schools have capacity at all tiers?	G	Small amount of spare capacity at Meppershall Lower School. Middle and upper projects are planned within the education planning area – financial contributions would be requested.
31	If not, has a commitment been made to address this?	G	See above
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	<p>What is the conclusion of the sequential approach to site allocations, in regards to flood risk?</p> <ul style="list-style-type: none"> • No assessment required (G) • Consider Further Assessment (A) • Further Assessment Required (R) 	G	Site is at limited risk of surface water flooding, assessment is unlikely to be required
Environmental Health			
34	<p>Contamination</p> <p>Are there any contamination constraints on site and will there be any remediation required?</p>	R/A/G	Awaiting comments
35	<p>Adjoining uses</p> <p>Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)</p>	A	noise from the grain dryer at Bury Farm to the south was a factor in recent planning app on this site
Environmental Constraints			
36	<p>Landscape character</p> <p>What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural</p>	A	Elevated / settlement edge site - need for landscape screening. Concern impact on character of High Street

	Beauty or the Nature Improvement Area?		
37	Heritage/ Archaeology What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of these assets?	R	Site is known to contain archaeological remains but this would not prevent allocation providing appropriate mitigation is undertaken. Heritage comments were OK but within planning app 16/01012 some significance has been attached to the house on the frontage (undesigned heritage asset) required to be demolished for the access.
38	Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?	G	Planning application 16/1012 – net gain proposed
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	G	No aspirations identified.
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	G	No issues
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		Refused planning application
Does the site continue to next stage?			No

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

The site is not to be considered for further assessment.

- The site would have an adverse impact on the settlement pattern of Meppershall due to its backland development.
- There are concerns regarding the adjoining land use and the impact that this could have on residential uses on the site.
- The development requires the demolition of a house to gain access, over which there is heritage concerns.

Site Assessment Framework for HOUSING³⁶

Site details	
Reference Number	NLP095
Site Name	
Site Address	Land to rear of Stocken House 59 Shefford Road Meppershall
Settlement	Meppershall
Size	Submitted Developable Area: 7.68ha Submitted Whole Site Area: 7.68ha Measured GIS Area: 7.68ha
Proposed Use	Housing
Any other information	See ALP211

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma:
			100
			Number of proposed dwellings as per CBC methodology:
			138

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not in Flood Zone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Not at risk from surface water flooding.

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not in AONB
Does the site continue to next stage?			Yes

³⁶ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more³⁷.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site is a logical extension to the settlement.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs³⁸.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ³⁹ ?	G	Provided on site.
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Paddock land
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by a land owner intent on developing the site.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	No legal or ownership problems.
12	Does the site already have planning permission for the proposed use? If yes, then score as Red	G	No planning history.

³⁷ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

³⁸ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

³⁹ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

	because it's not eligible for allocation.		
Does the site continue to next stage?			Yes

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Site not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) <p>Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*</p>	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ⁴⁰	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

Previously Developed Land

16	Is the site Previously Developed Land in accordance with the NPPF definition?	R	Greenfield
-----------	---	---	------------

⁴⁰ Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

	<ul style="list-style-type: none"> • 76% - 100% (G) • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 		
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	NA
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	No known community consultation
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	No impact on sustainability
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	There has been a 6.56% increase in new homes from 2006 to 2016.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There will be an additional 0.43% increase in new homes with outstanding planning permissions.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	G	There are no known physical constraints.
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	G	Will extend development beyond the road frontage, but there is an allocated site to the south extending the envelope already.
Agricultural Land Quality			
24	Would the development impact on high quality agricultural land? <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) • 50% of more in Grade 3b, 4 or 5 (A) 	A	Grade 3

	<ul style="list-style-type: none"> 50% or more in Grade 1, 2 or 3a (R) 		
--	---	--	--

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> Yes, in the settlement (G) Yes, proposed as part of the development (G) No, but an adjoining settlement does (A) Not in the settlement or an adjoining settlement (R) 	G	In settlement
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> Yes, in the settlement (G) Yes, proposed as part of the development (G) No, but an adjoining settlement does (A) Other catchment school available (A) 	A	Adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> Yes, in the settlement (G) Yes, proposed as part of the development (G) No, but an adjoining settlement does (A) Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> Yes, in the settlement (G) Yes, proposed as part of the development (G) No, but an adjoining settlement does (A) Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> Town Centre/ Supermarket (G) Convenience Store / Post Office / Newsagent (A) None (R) 	A	Post office
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> Less than 400m (G) 400m-800m (A) Over 800m (R) OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	G	339m
28	Distance to nearest train station: <ul style="list-style-type: none"> Less than 800m (G) 800m-1200m (A) Over 1200m (R) 	R	Over 1200m

29	Is the site accessible from the existing road network?	G	Shefford Road
School Capacity			
30	Do the local schools have capacity at all tiers?	A	Not much lower school capacity to manage additional homes, middle and upper schools already over capacity
31	If not, has a commitment been made to address this?	A	Lower school contributions likely to be required, plans are in place to expand middle and upper school places in the area.
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	What is the conclusion of the sequential approach to site allocations, in regards to flood risk? <ul style="list-style-type: none"> No assessment required (G) Consider Further Assessment (A) Further Assessment Required (R) 	G	Site is at limited risk of surface water flooding, assessment is unlikely to be required
Environmental Health			
34	Contamination Are there any contamination constraints on site and will there be any remediation required?	R/A/G	Awaiting comments
35	Adjoining uses Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)	G	Possible Noise from Plant / Odour from Neighbouring Commercial Care Home
Environmental Constraints			
36	Landscape character What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?	R/A	Some capacity if limited scale and set with strong mitigation to north and west and hedgerow frontage conserved.
37	Heritage/ Archaeology What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of these assets?	A	Site has multi-period archaeological potential but this would not prevent allocation providing appropriate mitigation is undertaken.

38	Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?	A	Some development along road corridor would be acceptable. Adj to Nunswood CWS and important GI for village
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	G	Limited aspirations from PGIP – seeking to create a cycle route along road to Shefford. Not identified as part of GI network at Mid Beds GI plan level. Would need to buffer adjacent Nunswood. No loss of LS open space.
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	G	No issues
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		No relevant planning history
Does the site continue to next stage?			Yes

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

The site is to be considered further for assessment.

- **The site forms an extension to the north west of the settlement.**
- **There are no physical or primary constraints to development on the site.**
- **Although Meppershall does not provide a wide range of services, the adjoining settlements provide these.**
- **In terms of environmental constraints, those identified can be mitigated, such as landscape and boundary with Nunswood. The hedgerow frontage needs to be conserved with strong mitigation to the north and west of the site.**
- **Mitigation may be required for the adjoining use.**

STAGE 3 : ACHIEVABILITY

This section assesses whether the site is Achievable in line with NPPG Guidance:

A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site, and the capacity of the developer to complete and let or sell the development over a certain period.

Viability

43	Referring to the Viability Assessment undertaken by consultants, is the probability of the site being viable high, medium or low? <ul style="list-style-type: none"> • High (G) Benchmark land value comfortably exceeded by likely residual value • Low (A) Marginal viability, with likely residual land value close to benchmark land value • Very Low (R) Likely residual value well below benchmark land value 	G	The Council's Residential Development Viability Report (Feb 2017) indicates that residual value of development in this value area and at this scale would exceed both the upper and lower benchmark land values and as such the report indicates that such development would likely be viable.
-----------	--	---	--

Achievability

44	Are there any market factors which would affect deliverability?		No known market factors. Site not under option from developer.
-----------	---	--	--

		<p>The Council's Residential Development Viability Report (Feb 2017) is based upon residential property figures between 2013 and 2016. The housing market within Central Bedfordshire has seen significant increases in residential property values in a relatively short period of time, whereby it is considered that the viability of developments within this report has been cautious. For example in 2016 Dunstable has benefited from a 17.9% housing price increase with an average annual house price increase in 2016 for housing within Central Bedfordshire of 10.74%.</p> <p>This increase in property value has been a result of not only national trends in house prices and existing transport links to economically successful areas but also significant infrastructure projects within the pipeline including: East-West Rail; M1-A5 link road; A421 upgrades; Oxford to Cambridge Express Way; Luton and Dunstable Guided Busway; M1 improvements; and potential A1 improvements. It is considered that as such infrastructure projects progress that property prices within the Local Authority will likely continue to increase which has and will increase viability/deliverability of development not only in the higher value areas but also the lower value areas of the Authority.</p>
45	<p>When can the scheme realistically commence delivery?</p> <ul style="list-style-type: none"> • 0 to 5 years (deliverable) • 6 to 10 years • 11 to 15 years • 15 to 20 years • Outside Plan Period 	<p>Deliverable</p> <p>0 to 5 years</p>
46	<p>What is the indicative build out time of the site?</p>	<p>Can be delivered within 5 years.</p> <p>The Case Study Sites outlined within the Council's Residential Development Viability Report (Feb 2017) indicates that after the site has received detailed planning permission a single housebuilder would likely take one year to first completion and would build out the</p>

			site at a rate of 50 dwellings per annum there after.
Does the site pass this stage?			Yes

SUMMARY

The sites that pass through this assessment process will not automatically be allocated for development in the Local Plan.

Sites will be selected with reference to a number of other factors including:

- The strategy, vision and objectives proposed in the draft plan
- Technical evidence studies
- The sustainability appraisal process
- The results of public consultation
- Flood Risk Sequential Approach
- Further transport modelling
- Consultation with neighbouring authorities

DRAFT

Site Assessment Framework for HOUSING⁴¹

Site details	
Reference Number	NLP096
Site Name	Wren Park
Site Address	Shefford road, Meppershall
Settlement	Meppershall
Size	Submitted Developable Area: 1.10ha Submitted Whole Site Area: 1.10ha Measured GIS Area: 1.10ha
Proposed Use	Redevelopment of care home
Any other information	Requires partial demolition of care home

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma:
			30-40
			Number of proposed dwellings as per CBC methodology:
			36

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

⁴¹ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more⁴².

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site is considered to be a previously developed site. The site is located to the west of Shefford Road and extends beyond the settlement envelope.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs⁴³.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ⁴⁴ ?	G	No critical infrastructure required
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	A	The development would require the conversion of the existing.
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by landowners intent on developing the site
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	There are no legal or ownership problems
12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	G	No planning permission

⁴² The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

⁴³ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁴⁴ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

Does the site continue to next stage?	Yes
---------------------------------------	-----

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Site not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ⁴⁵	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

Previously Developed Land

16	Is the site Previously Developed Land in accordance with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) 	G	Would require conversion or demolition of care home
-----------	--	---	---

⁴⁵ Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

	<ul style="list-style-type: none"> • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 		
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	No neighbourhood planning designation
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	No known community consultation
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	Aside from the loss of the care home there would be no impact on the sustainability of the settlement
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	Homes 2006: 655 Homes 2016: 698 There has been a 6.56% increase in new homes in Mepperhall.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There is outstanding planning permission for 3 dwellings; representing a 0.45% increase.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	G	There are no obvious physical constraints
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	A	The site proposes the conversion of the existing development into residential dwellings. There is development along both sides of Shefford. However, this site proposes development beyond the traditional development boundary along Shefford Road.
Agricultural Land Quality			
24	Would the development impact on high quality	R	Grade 2

	agricultural land? <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) • 50% of more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 		
--	---	--	--

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	Meppershall Lower School s
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Limited provision
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) • OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	A	Adjacent to Orchard Close
28	Distance to nearest train station:	R	Nearest train station Arlesey

	<ul style="list-style-type: none"> • Less than 800m (G) • 800m-1200m (A) • Over 1200m (R) 		
29	Is the site accessible from the existing road network?	G	Site accessible using existing access
School Capacity			
30	Do the local schools have capacity at all tiers?	G	Small amount of spare capacity at Meppershall Lower School. Middle and upper projects are planned within the education planning area – financial contributions would be requested.
31	If not, has a commitment been made to address this?	G	See above
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	<p>What is the conclusion of the sequential approach to site allocations, in regards to flood risk?</p> <ul style="list-style-type: none"> • No assessment required (G) • Consider Further Assessment (A) • Further Assessment Required (R) 	G	Site is at limited risk of surface water flooding, assessment is unlikely to be required
Environmental Health			
34	<p>Contamination</p> <p>Are there any contamination constraints on site and will there be any remediation required?</p>	R/A/G	Awaiting comments
35	<p>Adjoining uses</p> <p>Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)</p>	R/A/G	Awaiting comments
Environmental Constraints			
36	<p>Landscape character</p> <p>What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct</p>	A	Need to ensure landscape buffer between any development and Nunswood

	or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?		
37	Heritage/ Archaeology What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of these assets?	G	Site is considered to have low archaeological potential. No objection to allocation. OK in heritage terms
38	Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?	R	Adjacent CWS ancient woodland, currently care home, residential would bring detrimental impact to woodland.
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	A	No aspirations identified for site itself, should buffer and extend adjacent woodland at Nunnswood.
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	G	No issues
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		NA
Does the site continue to next stage?			Yes

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

Site is to be considered further for assessment.

- There are no major constraints to development on the site.
- The site adjoins the settlement boundary and is the redevelopment of an existing care home.
- There are ecological concerns with regards to developing the site as the site adjoins a CWS ancient woodland. Residential development is considered to be detrimental to the woodland so would need to be mitigated.

STAGE 3 : ACHIEVABILITY

This section assesses whether the site is Achievable in line with NPPG Guidance:

A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site, and the capacity of the developer to complete and let or sell the development over a certain period.

Viability

43	Referring to the Viability Assessment undertaken by consultants, is the probability of the site being viable high, medium or low? <ul style="list-style-type: none"> • High (G) Benchmark land value comfortably exceeded by likely residual value • Low (A) Marginal viability, with likely residual land value close to benchmark land value • Very Low (R) Likely residual value well below benchmark land value 	G	The Council's Residential Development Viability Report (Feb 2017) indicates that residual value of development in this value area and at this scale would exceed both the upper and lower benchmark land values and as such the report indicates that such development would likely be viable.
-----------	--	---	--

Achievability

<p>44</p>	<p>Are there any market factors which would affect deliverability?</p>	<p>The Council's Residential Development Viability Report (Feb 2017) is based upon residential property figures between 2013 and 2016. The housing market within Central Bedfordshire has seen significant increases in residential property values in a relatively short period of time, whereby it is considered that the viability of developments within this report has been cautious. For example in 2016 Dunstable has benefited from a 17.9% housing price increase with an average annual house price increase in 2016 for housing within Central Bedfordshire of 10.74%.</p> <p>This increase in property value has been a result of not only national trends in house prices and existing transport links to economically successful areas but also significant infrastructure projects within the pipeline including: East-West Rail; M1-A5 link road; A421 upgrades; Oxford to Cambridge Express Way; Luton and Dunstable Guided Busway; M1 improvements; and potential A1 improvements. It is considered that as such infrastructure projects progress that property prices within the Local Authority will likely continue to increase which has and will increase viability/deliverability of development not only in the higher value areas but also the lower value areas of the Authority.</p>
<p>45</p>	<p>When can the scheme realistically commence delivery?</p> <ul style="list-style-type: none"> • 0 to 5 years (deliverable) • 6 to 10 years • 11 to 15 years • 15 to 20 years • Outside Plan Period 	<p>0 to 5 years</p>
<p>46</p>	<p>What is the indicative build out time of the site?</p>	<p>The Case Study Sites outlined within the Council's Residential Development Viability Report (Feb 2017) indicates that after the site has received detailed planning permission a single housebuilder would likely take one year to build out this site.</p>
<p>Does the site pass this stage?</p>		<p>Yes</p>

SUMMARY

The sites that pass through this assessment process will not automatically be allocated for development in the Local Plan.

Sites will be selected with reference to a number of other factors including:

- The strategy, vision and objectives proposed in the draft plan
- Technical evidence studies
- The sustainability appraisal process
- The results of public consultation
- Flood Risk Sequential Approach
- Further transport modelling
- Consultation with neighbouring authorities

DRAFT

Site Assessment Framework for HOUSING⁴⁶

Site details	
Reference Number	NLP231
Site Name	Land at Coneygate
Site Address	Land at Coneygate
Settlement	Meppershall
Size	Submitted Developable Area: 0.40ha Submitted Whole Site Area: 0.40ha Measured GIS Area: 0.40ha
Proposed Use	residential
Any other information	Needs more info on access – proposed access sits across ROW (not insurmountable but site looks awkward)

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma:
			10-15
			Number of proposed dwellings as per CBC methodology:
			12

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

⁴⁶ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more⁴⁷.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site falls outside the settlement envelope of Meppershall on the east. There are no major physical constraints that separate it from Meppershall. It is considered that it could be a potential extension to the village.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs⁴⁸.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ⁴⁹ ?	A	Access
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Greenfield Site
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by landowner intent on developing the site
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	A	The access through an existing car park could be awkward.
12	Does the site already have planning permission for	G	No planning permission

⁴⁷ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

⁴⁸ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁴⁹ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

	the proposed use? If yes, then score as Red because it's not eligible for allocation.		
Does the site continue to next stage?			Yes

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Site in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ⁵⁰	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

Previously Developed Land

16	Is the site Previously Developed Land in accordance	R	Greenfield
-----------	---	---	------------

⁵⁰ Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

	with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 		
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	No Neighbourhood Planning designation
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	No known community consultation
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	There would be no impact on sustainability of the settlement.
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	Homes 2006: 655 Homes 2016: 698 There has been a 6.56% increase in new homes in Mepperhall.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There is outstanding planning permission for 3 dwellings; representing a 0.45% increase.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	G	There are no physical constraints
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	G	The site would not have an adverse impact on the character of the built environment.
Agricultural Land Quality			
24	Would the development impact on high quality agricultural land? <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) 	R	Grade 2

	<ul style="list-style-type: none"> • 50% of more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 		
--	--	--	--

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	Meppershall Lower School
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Limited provision
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) • OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	G	Less than 400m
28	Distance to nearest train station: <ul style="list-style-type: none"> • Less than 800m (G) • 800m-1200m (A) 	R	Nearest train station Arlesey

	<ul style="list-style-type: none"> Over 1200m (R) 		
29	Is the site accessible from the existing road network?	R	No access needed over private land of existing car parking area and over ROW
School Capacity			
30	Do the local schools have capacity at all tiers?	G	Small amount of spare capacity at Meppershall Lower School. Middle and upper projects are planned within the education planning area – financial contributions would be requested.
31	If not, has a commitment been made to address this?	G	See above
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	<p>What is the conclusion of the sequential approach to site allocations, in regards to flood risk?</p> <ul style="list-style-type: none"> No assessment required (G) Consider Further Assessment (A) Further Assessment Required (R) 	A	OW present, JFlow modelling required to confirm flood risk
Environmental Health			
34	<p>Contamination</p> <p>Are there any contamination constraints on site and will there be any remediation required?</p>	R/A/G	Awaiting comments
35	<p>Adjoining uses</p> <p>Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)</p>	R/A/G	Awaiting comments
Environmental Constraints			
36	<p>Landscape character</p> <p>What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?</p>	R	Site forms key landscape feature providing screening to existing development and component of local GI.
37	<p>Heritage/ Archaeology</p> <p>What would the impacts of development be on any</p>	A	Site has archaeological potential but this would not prevent

	heritage assets and their setting? Are there any opportunities for enhancement of these assets?		allocation providing appropriate mitigation is undertaken Heritage - Close to Monks Pool (LB)
38	Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?	R	Rough, scrubby grassland, loss of habitat for birds, invertebrates and small mammals
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	R	Identified in Parish GI plan as a possible location for creating new woodland.
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	G	No issues
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		NA
Does the site continue to next stage?			No

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

The site is not to be considered for further assessment.

- There are concerns over the inadequate access and likely impact of any proposed access is a significant detrimental component of the assessment.
- There are landscape concerns over the impact on the landscape as the site forms a key feature providing screening to the existing development.
- Development of the site will also result in the loss of important habitat.
- The Parish GI plan identifies this location as a new woodland.

Site Assessment Framework for HOUSING⁵¹

Site details	
Reference Number	NLP235
Site Name	Land to the west of Chapel Road
Site Address	Land to the west of Chapel Road, Meppershall
Settlement	Meppershall

Proposed Use	Housing
Any other information	

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma:243
			Number of proposed dwellings as per CBC methodology: 145.62

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not in flood zone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	No AONB
Does the site continue to next stage?			Yes

⁵¹ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more⁵².

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	R	The site is not well related to the existing settlement, being separated from built development by parcels of land. It would extend the settlement to the east and change the settlement pattern of Meppershall.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence.
Does the site continue to next stage?			No

⁵² The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

Site Assessment Framework for HOUSING⁵³

Site details	
Reference Number	NLP236
Site Name	Land opposite Chapel Farm
Site Address	Land opposite Chapel Farm

Size	Submitted Developable Area: 3.7ha Submitted Whole Site Area: 3.7ha Measured GIS Area: 3.82ha
Proposed Use	residential
Any other information	

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma: 111
			Number of proposed dwellings as per CBC methodology: 66

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

⁵³ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more⁵⁴.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site lies to the east of Meppershall. There is development to the east of Meppershall.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs⁵⁵.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ⁵⁶ ?	G	Can be provided
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Agricultural
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by land owner intent on developing the site.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	No known legal or ownership problems.
12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	G	NA

⁵⁴ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

⁵⁵ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁵⁶ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

Does the site continue to next stage?	Yes
---------------------------------------	-----

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Site not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ⁵⁷	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

Previously Developed Land

16	Is the site Previously Developed Land in accordance with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) 	R	Greenfield
-----------	--	---	------------

⁵⁷ Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

	<ul style="list-style-type: none"> • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 		
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	NA
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	NA
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	No loss of services or facilities
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	There has been a 6.56% increase in new homes since 2006.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There will be an additional 0.43% increase in new homes with outstanding planning permission.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	A	The site adjoins a SAM and Listed Church.
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	A	Although there is development to the east of Meppershall this proposal would not be well related to the core of the village.
Agricultural Land Quality			
24	Would the development impact on high quality agricultural land? <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) • 50% of more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 	R	Grade 2

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	In settlement
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	In adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Post office
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) • OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	A	785m
28	Distance to nearest train station: <ul style="list-style-type: none"> • Less than 800m (G) • 800m-1200m (A) • Over 1200m (R) 	R	Over 1200m
29	Is the site accessible from the existing road network?	G	Church Road and/ or Fildyke Road

School Capacity			
30	Do the local schools have capacity at all tiers?	A/R	Small amount of spare capacity at Meppershall Lower School. Middle and upper projects are planned within the education planning area – financial contributions would be requested. The number of sites in Meppershall is a concern as the existing lower school would not be able to accommodate all development without expansion, requiring additional land for the existing school site, or a new school site.
31	If not, has a commitment been made to address this?	A	See above
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	What is the conclusion of the sequential approach to site allocations, in regards to flood risk? <ul style="list-style-type: none"> No assessment required (G) Consider Further Assessment (A) Further Assessment Required (R) 	G	Site is at limited risk of surface water flooding, assessment is unlikely to be required
Environmental Health			
34	Contamination Are there any contamination constraints on site and will there be any remediation required?	R/A/G	Awaiting comments
35	Adjoining uses Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)	R/A/G	Awaiting comments
Environmental Constraints			
36	Landscape character What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?	R	land integral to farmed landscape and setting of village, elevated land so built form would be intrusive and restrict views of water tower ,roadside hedges also important.

37	Heritage/ Archaeology What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of these assets?	R	Heritage: Very sensitive site, next to SAM and LB farm and chapel. Impact on wider setting and therefore restraints regarding any development. Perhaps a stretch of land to the East to separate from the heritage assets. Arch: This site is considered to have low archaeological potential and therefore the Archaeology Team would have no objection to its allocation.
38	Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?	A	Grade 2 agric land. Potential impact on farmland species Retain and buffer hedgerows, adjacent to Orchard HPI. Opportunity for net gain.
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	A/G	RoW across southern fringe of site – Parish GI plan identifies the opportunity for upgrade for cycling. Development would need to enhance RoW corridor through positive design.
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	R/A/G	Awaiting comments
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		NA
Does the site continue to next stage?			No

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

Site not to be considered for further assessment.

- **The site is integral to the farmed landscape and setting of the village and is elevated so the built form would be intrusive to this setting.**
- **The site is very sensitive as it adjoins a SAM and Listed Building.**
- **Although there are developments to the east of Meppershall this development would not relate well to the core of the village.**

Site Assessment Framework for HOUSING⁵⁸

Site Name	Part of Bandland Nursery
Site Address	32 Shefford Road
Settlement	Meppershall
Size	Submitted Developable Area: 3ha Submitted Whole Site Area: 3ha Measured GIS Area: 1.26ha
Proposed Use	residential
Any other information	Polygon shown incorrectly on GIS – land promotion extends to additional land and access through 32 Shefford Road. Check site measurements.

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma:
			100
			Number of proposed dwellings as per CBC methodology:
			54

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

⁵⁸ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more⁵⁹.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	A	The site falls outside the settlement envelope and extends beyond the road frontage. There is precedent with development extending eastwards. The site is currently separated from the settlement to the south.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs⁶⁰.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ⁶¹ ?	G	No critical infrastructure required
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Greenfield site. Demolition of existing buildings on site required.
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by land owners intent on developing the site
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	There are no legal or ownership problems

⁵⁹ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

⁶⁰ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁶¹ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	G	No planning permission
Does the site continue to next stage?			Yes

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Site not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ⁶²	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

Previously Developed Land

⁶² Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

16	Is the site Previously Developed Land in accordance with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 	R	Greenfield
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	No Neighbourhood Planning designation
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	No known community consultation
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	There would be no impact on sustainability of the settlement.
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	Homes 2006: 655 Homes 2016: 698 There has been a 6.56% increase in new homes in Mepperhall.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There is outstanding planning permission for 3 dwellings; representing a 0.45% increase.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	G	There are no physical constraints
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	A	This site would extend development eastwards. There is precedent with development extending beyond the frontage of Shefford Road.
Agricultural Land Quality			
24	Would the development impact on high quality agricultural land?	R	Grade 2

	<ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) • 50% or more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 		
--	--	--	--

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	Meppershall Lower School
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Limited provision
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) • OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	G	Adj to Orchard Close
28	Distance to nearest train station: <ul style="list-style-type: none"> • Less than 800m (G) 	R	Nearest train station Arlesey

	<ul style="list-style-type: none"> • 800m-1200m (A) • Over 1200m (R) 		
29	Is the site accessible from the existing road network?	G	Site accessible from existing road network but requires demolition of existing dwelling
School Capacity			
30	Do the local schools have capacity at all tiers?	G	Small amount of spare capacity at Meppershall Lower School. Middle and upper projects are planned within the education planning area – financial contributions would be requested.
31	If not, has a commitment been made to address this?	G	See above
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	What is the conclusion of the sequential approach to site allocations, in regards to flood risk? <ul style="list-style-type: none"> • No assessment required (G) • Consider Further Assessment (A) • Further Assessment Required (R) 	G	Site is at limited risk of surface water flooding, assessment is unlikely to be required
Environmental Health			
34	Contamination Are there any contamination constraints on site and will there be any remediation required?	R/A/G	Awaiting comments
35	Adjoining uses Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)	R/A/G	Awaiting comments
Environmental Constraints			
36	Landscape character What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?	R/A/G	Awaiting comments

37	Heritage/ Archaeology What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of these assets?	G	Site is considered to have low archaeological potential. No objection to allocation. Heritage - OK
38	Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?	A	Retain and buffer hedgerow, possible impact to farmland species.
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	G	No aspirations identified in parish GI plan
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	G	No issues
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		NA
Does the site continue to next stage?			Yes

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

Site to be considered further for assessment.

- There are no major constraints to the site.
- There would be no adverse impact on the settlement pattern.
- Although the site falls outside the settlement envelope, it could be a logical extension to development on the site.
- Mitigation will be required to reduce the impact on the ecological and landscape impacts.

STAGE 3 : ACHIEVABILITY

This section assesses whether the site is Achievable in line with NPPG Guidance:

A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site, and the capacity of the developer to complete and let or sell the development over a certain period.

Viability

43	Referring to the Viability Assessment undertaken by consultants, is the probability of the site being viable high, medium or low? <ul style="list-style-type: none"> • High (G) Benchmark land value comfortably exceeded by likely residual value • Low (A) Marginal viability, with likely residual land value close to benchmark land value • Very Low (R) Likely residual value well below benchmark land value 	G	The Council's Residential Development Viability Report (Feb 2017) indicates that residual value of development in this value area and at this scale would exceed both the upper and lower benchmark land values and as such the report indicates that such development would likely be viable.
-----------	--	---	--

Achievability

44	Are there any market factors which would affect deliverability?		The Council's Residential Development Viability Report (Feb 2017) is based upon residential
-----------	---	--	---

		<p>property figures between 2013 and 2016. The housing market within Central Bedfordshire has seen significant increases in residential property values in a relatively short period of time, whereby it is considered that the viability of developments within this report has been cautious. For example in 2016 Dunstable has benefited from a 17.9% housing price increase with an average annual house price increase in 2016 for housing within Central Bedfordshire of 10.74%.</p> <p>This increase in property value has been a result of not only national trends in house prices and existing transport links to economically successful areas but also significant infrastructure projects within the pipeline including: East-West Rail; M1-A5 link road; A421 upgrades; Oxford to Cambridge Express Way; Luton and Dunstable Guided Busway; M1 improvements; and potential A1 improvements. It is considered that as such infrastructure projects progress that property prices within the Local Authority will likely continue to increase which has and will increase viability/deliverability of development not only in the higher value areas but also the lower value areas of the Authority.</p>
45	<p>When can the scheme realistically commence delivery?</p> <ul style="list-style-type: none"> • 0 to 5 years (deliverable) • 6 to 10 years • 11 to 15 years • 15 to 20 years • Outside Plan Period 	0 to 5 years
46	What is the indicative build out time of the site?	<p>The Case Study Sites outlined within the Council's Residential Development Viability Report (Feb 2017) indicates that after the site has received detailed planning permission a single housebuilder would likely take one year to first completion and would build out the site at a rate of 40 dwellings per annum thereafter.</p>
Does the site pass this stage?		Yes

SUMMARY

The sites that pass through this assessment process will not automatically be allocated for development in the Local Plan.

Sites will be selected with reference to a number of other factors including:

- The strategy, vision and objectives proposed in the draft plan
- Technical evidence studies
- The sustainability appraisal process
- The results of public consultation
- Flood Risk Sequential Approach
- Further transport modelling
- Consultation with neighbouring authorities

DRAFT

Site Assessment Framework for HOUSING⁶³

Site details	
Reference Number	NLP282
Site Name	Land off Stondon Road
Site Address	Land off Stondon Road
Settlement	Meppershall
Size	Submitted Developable Area: 1ha Submitted Whole Site Area: 1.9ha Measured GIS Area: 1.97ha
Proposed Use	residential
Any other information	

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma:
			25
			Number of proposed dwellings as per CBC methodology:
			24

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

⁶³ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more⁶⁴.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site can be considered a logical extension to the east of Meppershall.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs⁶⁵.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ⁶⁶ ?	G	Can be provided
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Nurseries
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by land owner intent on developing the site.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	No known legal or ownership problems that could effect development.
12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	G	No

⁶⁴ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

⁶⁵ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁶⁶ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

Does the site continue to next stage?	Yes
---------------------------------------	-----

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Site not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ⁶⁷	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

Previously Developed Land

16	Is the site Previously Developed Land in accordance with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) 	R	Greenfield
-----------	--	---	------------

⁶⁷ Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

	<ul style="list-style-type: none"> • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 		
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	No NP
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	Unknown
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	No loss of services and facilities
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	There has been a 6.56% increase in new homes since 2006.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There will be an additional 0.43% increase in new homes with outstanding planning permission.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	G	No
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	G	The proposal would extend development eastwards. There is development extending eastwards in Meppershall so this would not set a precedent.
Agricultural Land Quality			
24	Would the development impact on high quality agricultural land? <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) • 50% or more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 	R	Grade 2

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	In settlement
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	In adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Post office
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) • OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	R	Over 800m
28	Distance to nearest train station: <ul style="list-style-type: none"> • Less than 800m (G) • 800m-1200m (A) • Over 1200m (R) 	R	Over 1200m
29	Is the site accessible from the existing road network?	G	Stondon Road

School Capacity			
30	Do the local schools have capacity at all tiers?	A/R	Small amount of spare capacity at Meppershall Lower School. Middle and upper projects are planned within the education planning area – financial contributions would be requested. The number of sites in Meppershall is a concern as the existing lower school would not be able to accommodate all development without expansion, requiring additional land for the existing school site, or a new school site.
31	If not, has a commitment been made to address this?	A	See above
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	What is the conclusion of the sequential approach to site allocations, in regards to flood risk? <ul style="list-style-type: none"> No assessment required (G) Consider Further Assessment (A) Further Assessment Required (R) 	A	OW present, JFlow modelling required to confirm flood risk
Environmental Health			
34	Contamination Are there any contamination constraints on site and will there be any remediation required?	R/A/G	Awaiting comments
35	Adjoining uses Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)	R/A/G	Awaiting comments
Environmental Constraints			
36	Landscape character What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?	G	Scope for development in scale with settlement pattern

37	<p>Heritage/ Archaeology What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of these assets?</p>	A	<p>This site lies adjacent to the historic core of the settlement of Meppershall (as recorded on the CBC Historic Environment Record) and close to an area that has produced Iron Age and Roman material. Therefore this site has archaeological potential. Archaeological potential does not prevent allocation or development providing that an appropriate mitigation strategy in line with para 141 of the NPPF was implemented. Any planning submission would need to be accompanied by the results of an intrusive archaeological field evaluation to satisfy para 128 of the NPPF. This site also lies in the wider setting of The Hills medieval motte and bailey castle, Scheduled Monument; therefore consideration must also be given to the impact of the proposals on the setting of the Scheduled Monument (required by paras 132 - 134 of the NPPF). Should the site be allocated, a contingency or archaeological works must be included in any proposal to prevent issues with viability. Heritage: Within the setting of various listed buildings and SAM. Reasonably sensitive site. Need for caution in relationship to context, density and design</p>
38	<p>Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?</p>	A	<p>Grade 2 agric land. Potential impact on species of principal importance. Retain and buffer hedgerows, opportunity for net gain.</p>
39	<p>Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?</p>	G	<p>No aspirations identified in parish GI plan. Opportunity to create / enhance hedgerow boundaries.</p>
Minerals and Waste			
40	<p>What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?</p>	G	<p>No issues</p>
Planning History			
41	<p>What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)</p>		<p>NA</p>

Does the site continue to next stage?	Yes
---------------------------------------	-----

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

The site is to be considered further for assessment.

- There are no major constraints to development on the site.
- The site can be considered a logical extension to Meppershall.
- Development does extend eastwards in Meppershall and care would need to be had to the design and transition between the rural and urban edge.

STAGE 3 : ACHIEVABILITY

This section assesses whether the site is Achievable in line with NPPG Guidance:

A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site, and the capacity of the developer to complete and let or sell the development over a certain period.

Viability	
<p>43</p> <p>Referring to the Viability Assessment undertaken by consultants, is the probability of the site being viable high, medium or low?</p> <ul style="list-style-type: none"> • High (G) Benchmark land value comfortably exceeded by likely residual value • Low (A) Marginal viability, with likely residual land value close to benchmark land value • Very Low (R) Likely residual value well below benchmark land value 	<p style="text-align: center;">G</p> <p>The Council's Residential Development Viability Report (Feb 2017) indicates that residual value of development in this value area and at this scale would exceed both the upper and lower benchmark land values and as such the report indicates that such development would likely be viable.</p>
Achievability	
<p>44</p> <p>Are there any market factors which would affect deliverability?</p>	<p>The Council's Residential Development Viability Report (Feb 2017) is based upon residential property figures between 2013 and 2016. The housing market within Central Bedfordshire has seen significant increases in residential property values in a relatively short period of time, whereby it is considered that the viability of developments within this report has been cautious. For example in 2016 Dunstable has benefited from a 17.9% housing price increase with an average annual house price increase in 2016 for housing within Central Bedfordshire of 10.74%.</p> <p>This increase in property value has been a result of not only national trends in house prices and existing transport links to economically successful areas but also significant infrastructure projects within the pipeline including: East-</p>

		West Rail; M1-A5 link road; A421 upgrades; Oxford to Cambridge Express Way; Luton and Dunstable Guided Busway; M1 improvements; and potential A1 improvements. It is considered that as such infrastructure projects progress that property prices within the Local Authority will likely continue to increase which has and will increase viability/deliverability of development not only in the higher value areas but also the lower value areas of the Authority.
45	When can the scheme realistically commence delivery? <ul style="list-style-type: none"> • 0 to 5 years (deliverable) • 6 to 10 years • 11 to 15 years • 15 to 20 years • Outside Plan Period 	0 to 5 years
46	What is the indicative build out time of the site?	The Case Study Sites outlined within the Council's Residential Development Viability Report (Feb 2017) indicates that after the site has received detailed planning permission a single housebuilder would likely take one year to build out this site.
Does the site pass this stage?		Yes

SUMMARY

The sites that pass through this assessment process will not automatically be allocated for development in the Local Plan.

Sites will be selected with reference to a number of other factors including:

- The strategy, vision and objectives proposed in the draft plan
- Technical evidence studies
- The sustainability appraisal process
- The results of public consultation
- Flood Risk Sequential Approach
- Further transport modelling
- Consultation with neighbouring authorities

Site Assessment Framework for HOUSING⁶⁸

Site details	
Reference Number	NLP283
Site Name	
Site Address	Shefford Road Meppershall
Settlement	Meppershall
Size	Submitted Developable Area:3ha Submitted Whole Site Area: 5.6ha Measured GIS Area: 3
Proposed Use	Housing
Any other information	

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma: 100
			Number of proposed dwellings as per CBC methodology: 54

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not in flood zone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not in AONB
Does the site continue to next stage?			Yes

⁶⁸ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more⁶⁹.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site is a logical extension to the settlement.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs⁷⁰.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ⁷¹ ?	G	Can be provided on site.
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Agricultural land - paddocks
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by land owner intent on developing the site.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically overcome?	G	No known legal or ownership issues.
12	Does the site already have planning permission for the proposed use? If yes, then score as Red	G	No planning application

⁶⁹ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

⁷⁰ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁷¹ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

	because it's not eligible for allocation.		
Does the site continue to next stage?			Yes

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	Yes or no	Not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ⁷²	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

Previously Developed Land

16	Is the site Previously Developed Land in accordance	R	Greenfield
-----------	---	---	------------

⁷² Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

	with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 		
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	NA
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	No community consultation
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	No impact on sustainability
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	There has been a 6.56% increase in new homes since 2006.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There will be an additional 0.43% increase in new homes with outstanding planning permission.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	G	No constraints.
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	G	The site would extend development eastwards but it would not be detrimental to the settlement pattern of Meppershall
Agricultural Land Quality			
24	Would the development impact on high quality agricultural land? <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) 	R	Grade 2

	<ul style="list-style-type: none"> • 50% of more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 		
--	--	--	--

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	In settlement
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	In adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Post office
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) • OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	R	Over 800m
28	Distance to nearest train station: <ul style="list-style-type: none"> • Less than 800m (G) • 800m-1200m (A) 	R	Over 1200m

	<ul style="list-style-type: none"> Over 1200m (R) 		
29	Is the site accessible from the existing road network?	G	Langford Road
School Capacity			
30	Do the local schools have capacity at all tiers?	A	Not much lower school capacity to manage additional homes, middle and upper schools already over capacity
31	If not, has a commitment been made to address this?	A	Lower school contributions likely to be required, plans are in place to expand middle and upper school places in the area.
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	<p>What is the conclusion of the sequential approach to site allocations, in regards to flood risk?</p> <ul style="list-style-type: none"> No assessment required (G) Consider Further Assessment (A) Further Assessment Required (R) 	A	OW present, JFlow modelling required to confirm flood risk
Environmental Health			
34	<p>Contamination</p> <p>Are there any contamination constraints on site and will there be any remediation required?</p>	R/A/G	Awaiting comments
35	<p>Adjoining uses</p> <p>Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)</p>	G	No issues
Environmental Constraints			
36	<p>Landscape character</p> <p>What would the impacts of development be on the landscape character or setting of the area or any designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?</p>	A	Some capacity if limited scale and set with strong mitigation to south and east .
37	<p>Heritage/ Archaeology</p> <p>What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of</p>	A	Site has multi-period archaeological potential but this would not prevent allocation providing appropriate mitigation is

	these assets?		undertaken.
38	Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?	A	Appears to be Grade 2 agric land but little ecological interest expected.
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	G	No aspirations identified in Parish GI plan. RoW runs along south eastern edge. No loss of LS open space.
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	G	No issues
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		NA
Does the site continue to next stage?			Yes

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

The site is to be considered further for assessment.

- **The site forms an extension to the east of the settlement.**
- **There are no physical or primary constraints to development on the site.**
- **Although Meppershall does not provide a wide range of services, the adjoining settlements provide these.**
- **In terms of environmental constraints, those identified can be mitigated, such as landscape.**

STAGE 3 : ACHIEVABILITY

This section assesses whether the site is Achievable in line with NPPG Guidance:

A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site, and the capacity of the developer to complete and let or sell the development over a certain period.

Viability			
43	Referring to the Viability Assessment undertaken by consultants, is the probability of the site being viable high, medium or low? <ul style="list-style-type: none"> • High (G) Benchmark land value comfortably exceeded by likely residual value • Low (A) Marginal viability, with likely residual land value close to benchmark land value • Very Low (R) Likely residual value well below benchmark land value 	G	The Council's Residential Development Viability Report (Feb 2017) indicates that residual value of development in this value area and at this scale would exceed both the upper and lower benchmark land values and as such the report indicates that such development would likely be viable.
Achievability			
44	Are there any market factors which would affect deliverability?		Not under option from developer. The Council's Residential Development Viability Report (Feb 2017) is based upon residential property figures between 2013 and

		<p>2016. The housing market within Central Bedfordshire has seen significant increases in residential property values in a relatively short period of time, whereby it is considered that the viability of developments within this report has been cautious. For example in 2016 Dunstable has benefited from a 17.9% housing price increase with an average annual house price increase in 2016 for housing within Central Bedfordshire of 10.74%.</p> <p>This increase in property value has been a result of not only national trends in house prices and existing transport links to economically successful areas but also significant infrastructure projects within the pipeline including: East-West Rail; M1-A5 link road; A421 upgrades; Oxford to Cambridge Express Way; Luton and Dunstable Guided Busway; M1 improvements; and potential A1 improvements. It is considered that as such infrastructure projects progress that property prices within the Local Authority will likely continue to increase which has and will increase viability/deliverability of development not only in the higher value areas but also the lower value areas of the Authority.</p>
45	<p>When can the scheme realistically commence delivery?</p> <ul style="list-style-type: none"> • 0 to 5 years (deliverable) • 6 to 10 years • 11 to 15 years • 15 to 20 years • Outside Plan Period 	<p>Deliverable</p> <p>0 to 5 years</p>
46	<p>What is the indicative build out time of the site?</p>	<p>Can be delivered over a 4 year period.</p> <p>The Case Study Sites outlined within the Council's Residential Development Viability Report (Feb 2017 indicates that after the site has received detailed planning permission a single housebuilder would likely take one year to first completion and would build out the site at a rate of 40 dwellings per annum thereafter.</p>
Does the site pass this stage?		Yes

SUMMARY

The sites that pass through this assessment process will not automatically be allocated for development in the Local Plan.

Sites will be selected with reference to a number of other factors including:

- The strategy, vision and objectives proposed in the draft plan
- Technical evidence studies
- The sustainability appraisal process
- The results of public consultation
- Flood Risk Sequential Approach
- Further transport modelling
- Consultation with neighbouring authorities

DRAFT

Site Assessment Framework for HOUSING⁷³

Site details	
Reference Number	NLP313
Site Name	Land at Bury Farm
Site Address	Land at Bury Farm
Settlement	Meppershall
Size	Submitted Developable Area: 0.45ha Submitted Whole Site Area: 0.45ha Measured GIS Area: 0.42ha
Proposed Use	residential
Any other information	Adjacent Nursery is subject to a planning application for residential development CB/16/01012 – grain dryer at Bury farm may be a noise constraint. Need comments from Environmental Health/DM.

STAGE 1 : SUITABILITY AND AVAILABILITY (EXCLUSIONARY STAGE)

This section will exclude any sites which do not pass the exclusionary suitability criteria and they will not be assessed further.

STAGE 1A ASSESSMENT

This stage of the assessment rules out sites that are too small or conflict with national policy designations.

Provisional Site Capacity

1	Is the site likely to accommodate less than 10 dwellings? Work out the number of new homes from site size using density of 30dph and exclude up to 40 % depending on site size of land for infrastructure and services, take into account topography or significant areas of undevelopable land. Site Size Gross to net ratio standards <ul style="list-style-type: none"> Up to 0.4 hectare 100% 0.4 to 2 hectares 80% 2 hectares or above 60% <i>Note: for this calculation use the submitted Developable Area, or the area measured in GIS if this is smaller.</i>	No	Number of proposed dwellings as per proforma: 10-12 Number of proposed dwellings as per CBC methodology: 11
----------	--	----	--

Flood Risk (All sites which reach Stage 2 will be subject to the Sequential Test)

2	Is more than 50% of the site located in Flood Zone 2 or 3?	No	Site not within Floodzone 2 or 3
3	Is more than 50% of the site at risk from surface water flooding?	No	Site not at risk from surface water flooding

Nationally significant designations (All sites which reach Stage 2 be subject to detailed assessment)

4	Is more than 50% of the site covered by nationally significant designations? These are: Sites of Special Scientific Interest, National Nature Reserves, Scheduled Monuments, Registered Parks and Gardens.	No	No nationally significant designations on site.
5	Is more than 50% of the site located within the Area of Outstanding Natural Beauty?	No	Not within AONB
Does the site continue to next stage?			Yes

⁷³ Employment sites and Gypsy and Traveller sites will be assessed using separate bespoke site assessment criteria.

STAGE 1B ASSESSMENT

This stage of the assessment rules out sites that are not well related to existing settlements but are of an insufficient size to be self contained. It also rules out sites which would cause coalescence of existing towns or villages. For the purposes of this assessment, a self-contained site is defined as a site which will provide 1,500 homes or more⁷⁴.

Relationship to Settlement

6	For sites that are not of a sufficient scale to be self-contained, is the site a logical extension to the settlement or are there any major physical constraints (for example A roads, rivers or railways) that separate it from the main settlement?	G	The site falls outside the settlement envelope of Meppershall on the west. There are no major physical constraints that separate it from Meppershall. It is considered that it could be a potential extension to the village.
7	Does the site cause coalescence between an existing village or town and another existing village or town? If yes, then grade as Amber if the site would be able to provide appropriate buffers or green wedges to mitigate this, or Red if it would not be possible for appropriate buffers to be provided leaving a reasonable developable area based on the individual context of the site.	G	No coalescence
Does the site continue to next stage?			Yes

STAGE 1C ASSESSMENT

This stage of the assessment rules out sites that are not able to meet their critical infrastructure needs⁷⁵.

Critical Infrastructure

8	Can the site meet the critical infrastructure requirements that will enable delivery ⁷⁶ ?	G	No critical infrastructure required
Does the site continue to next stage?			Yes

STAGE 1D ASSESSMENT

This stage of the assessment rules out sites that are not available. A site is considered available for development where there are no legal or ownership problems and the landowner has expressed an intention to develop the site.

Availability

9	What is the existing use of the site? Would the existing use limit the development potential?	G	Greenfield site
10	Is the land controlled by a developer or land owner who has expressed an intention to develop the site?	G	Land controlled by land owners intent on developing the site.
11	Are there any legal or ownership problems that could delay or prevent development? If Yes, then can these be issues be realistically	G	There are no legal or ownership problems

⁷⁴ The figure of 1,500 homes has been taken from the Government Publication 'Locally-Led Garden Villages, Towns and Cities'. This defines the eligibility criteria for Garden Villages as standalone settlements of between 1,500 and 10,000 homes. (see https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508205/Locally-led_garden_villages_towns_and_cities.pdf)

⁷⁵ Critical infrastructure is that which has been identified as infrastructure that must happen to enable physical development. These infrastructure items are often known as 'blockers' or 'showstoppers', and are most common in relation to transport and utilities infrastructure. Failure to provide these pieces of infrastructure could result in significant delays in the delivery of development.

⁷⁶ This is an assessment based on the information known at this stage, a full assessment of infrastructure requirements will be undertaken before any sites are allocated.

	overcome?		
12	Does the site already have planning permission for the proposed use? If yes, then score as Red because it's not eligible for allocation.	G	No planning permission
Does the site continue to next stage?			Yes

STAGE 1E ASSESSMENT

This section records the findings of the Strategic Green Belt Review and also provides a preliminary screening of sites to determine whether they may be capable of demonstrating Exceptional Circumstances. Any site in the Green Belt that is determined as suitable based on the high level SHLAA assessment would still have to demonstrate Exceptional Circumstances to be considered for allocation in the Plan.

Greenbelt

13	Is the site located within the Green Belt?	No	Not in green belt
14	If answer to question 13 is yes, then does the site lie within one of the parcels which have been identified in the Central Bedfordshire and Luton Green Belt Study as making only a relatively weak, weak, or no contribution? If yes, site progresses through to Stage 2.	Yes or No	Details
15a	Does the site have all of the following merits that may outweigh the harm to the Green Belt and which may contribute to identification of exceptional circumstances? <ul style="list-style-type: none"> • Adjoining settlement has at least 3 of the following key local services - convenience shop, lower school, middle school, upper school, village hall, GP surgery, post office, library (use settlement audit) • Site makes a strong contribution to housing need (100 plus homes) within the Luton HMA • Site is in or directly adjacent to a settlement that has a mainline rail station or direct access (junction) to the strategic road network (A road or motorway) Sites in Green Belt other than those covered by 14 and 15b that cannot meet these criteria, will not progress any further in this assessment of suitability.*	Yes or No	Details
15b	Sites which have support from the local community as demonstrated through an allocation in an adopted or draft Neighbourhood Plan (that has been subject to Regulation 14 consultation) that do not meet the criteria in question 15a will automatically progress through this stage to be considered further at Stage 2. ⁷⁷	Yes/ No/ N/A	Details
Does the site continue to next stage?			Yes

STAGE 2 : SUITABILITY (DETAILED ASSESSMENT)

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using detailed desktop assessment. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2A will be looked at as a whole using planning balance.

⁷⁷ Draft Neighbourhood Plan allocations in Green Belt that are proposed after this site assessment phase has concluded, may still be considered for allocation.

Previously Developed Land			
16	Is the site Previously Developed Land in accordance with the NPPF definition? <ul style="list-style-type: none"> • 76% - 100% (G) • 26 - 75% (A) • 25% - 0% (Greenfield) (R) 	R	Greenfield Land
Community			
17	Neighbourhood Planning (only applicable in designated areas) Is the site identified as a housing allocation in an emerging Neighbourhood Plan?	No	No Neighbourhood Planning designation
18	Community Consultation Has any community consultation taken place? If yes, provide brief details on the form this consultation took and any overall community response.	No	No known community consultation
19	Sustainability of Settlement Would this proposal impact on the sustainability of the settlement through the loss of services and facilities (for example, employment, retail, public house etc)	No	There would be no impact on sustainability of the settlement
Cumulative Impact			
20	Considering housing completions over the past 10 years, what has been the level of housing growth in the parish? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of completions over the last ten years as a percentage of the dwellings in April 2006 (as calculated using census and completions data).</i>	A	Homes 2006: 655 Homes 2016: 698 There has been a 6.56% increase in new homes in Mepperhall.
21	What level of housing growth would there be if all the outstanding permissions (as of April 2016) were to be completed? <ul style="list-style-type: none"> • Less than 5% growth (G) • 5% to 20% growth (A) • More than 20% growth (R) <i>This is calculated by working out the total number of outstanding permissions as of April 1st 2016 as percentage of the total number of dwellings in April 2016 (as calculated using census and completions data).</i>	G	There is outstanding planning permission for 3 dwellings; representing a 0.45% increase.
Physical Constraints			
22	Are there any physical constraints or permanent features that affect the site's developability? For example pylons, gas works, sewage treatment works, topography or wind turbines.	A	The grain dryer at Bury Farm was the cause of a noise objection during a planning application on an adjacent housing site ALP473 and NLP050 (CB/16/01012 – refused)
Relationship to Settlement			
23	Would development of the site be complementary to the existing settlement pattern, and would it have an adverse impact on any historic, unique or distinctive characteristics of the settlement's built or natural form?	G	The site would not have an adverse impact on the character of the built environment
Agricultural Land Quality			

24	Would the development impact on high quality agricultural land? <ul style="list-style-type: none"> • 50% or more in non-agricultural land (G) • 50% or more in Grade 3b, 4 or 5 (A) • 50% or more in Grade 1, 2 or 3a (R) 	R	Grade 2
----	--	---	---------

STAGE 2 ASSESSMENT

This stage further assesses the site's suitability using comments from technical specialists. A red rating for any question does not mean that the site will be automatically excluded at this stage as the ratings across Stage 2B will be looked at as a whole using planning balance.

Transport and Access to Services

25	Facilities and services Question 26 considers the suitability and sustainability of the site for housing. It links to the Council's Settlement Hierarchy Audit. Issues relating to capacity are assessed separately		
25a	Does the settlement have a Primary/Lower school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	G	Meppershall Lower School
25b	Does the settlement have a Middle school (if applicable)? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25c	Does the settlement have a Secondary/ Upper school? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Other catchment school available (A) 	A	Adjoining settlement
25d	Does the settlement have a GPs surgery or medical centre? <ul style="list-style-type: none"> • Yes, in the settlement (G) • Yes, proposed as part of the development (G) • No, but an adjoining settlement does (A) • Not in the settlement or an adjoining settlement (R) 	A	Adjoining settlement
26	What retail provision does the settlement offer? <ul style="list-style-type: none"> • Town Centre/ Supermarket (G) • Convenience Store / Post Office / Newsagent (A) • None (R) 	A	Limited provision
27	Distance to bus stops with a frequent service (at least hourly at peak times): <ul style="list-style-type: none"> • Less than 400m (G) • 400m-800m (A) • Over 800m (R) • OR submission form stated that improved public transport facilities could be provided as part of the development (G) 	R	Over 800m opp village hall

28	Distance to nearest train station: <ul style="list-style-type: none"> • Less than 800m (G) • 800m-1200m (A) • Over 1200m (R) 	R	Nearest train station Arlesey
29	Is the site accessible from the existing road network?	G	Appears to be accessible from land within the ownership of the landowner
School Capacity			
30	Do the local schools have capacity at all tiers?	G	Small amount of spare capacity at Meppershall Lower School. Middle and upper projects are planned within the education planning area – financial contributions would be requested.
31	If not, has a commitment been made to address this?	G	See above
Water Utilities (Gas, Electricity and Broadband Infrastructure will be assessed at a later stage)			
32	Is there the capacity to provide all required infrastructure for waste water and potable water?	R/A/G	Water utilities companies have a statutory duty to supply water and waste water infrastructure to new development sites and a lack of available capacity does not prevent future development. Any infrastructure upgrades required will depend on the quantum and location of growth falling within each catchment area. Whilst the Stage 1 Water Cycle Study (April 2017) identifies the current capacity of existing water infrastructure, a Stage 2 study will be prepared to test the cumulative effect of sites that have been shortlisted for allocation in the Local Plan and identify the nature and timing of any upgrades required.
Drainage and Flooding (All sites subject to Sequential Test)			
33	What is the conclusion of the sequential approach to site allocations, in regards to flood risk? <ul style="list-style-type: none"> • No assessment required (G) • Consider Further Assessment (A) • Further Assessment Required (R) 	A	OW present, JFlow modelling required to confirm flood risk
Environmental Health			
34	Contamination Are there any contamination constraints on site and will there be any remediation required?	R/A/G	Awaiting comments
35	Adjoining uses Would any adjoining uses have the potential to cause conflict with the proposed use? (for example; noise and smell)	R/A/G	Awaiting comments
Environmental Constraints			
36	Landscape character What would the impacts of development be on the landscape character or setting of the area or any	A	Elevated exposed site areas, need to protect character of approach to village and exposed rural edge to

	designated landscapes? Would there be any direct or indirect harm to the Area of Outstanding Natural Beauty or the Nature Improvement Area?		north and west
37	Heritage/ Archaeology What would the impacts of development be on any heritage assets and their setting? Are there any opportunities for enhancement of these assets?	A	Site has archaeological potential but this would not prevent allocation providing appropriate mitigation is undertaken Conservation Officer- OK
38	Ecological Assets What would the impacts of development be on any biological, geological or ecological assets and are there any opportunities for their enhancement?	G	Farmyard, no ecological interest, easy to secure net gain
39	Open space/leisure and GI assets Are there any potential conflicts with open space, leisure designations or Rights of Way? Is there capacity to provide the required levels of open space and green infrastructure?	G	No aspirations identified in parish GI plan.
Minerals and Waste			
40	What would the impacts of development be on safeguarded minerals and waste sites, including mineral safeguarding sites?	G	No issues
Planning History			
41	What is the sites planning history? (For example planning applications and submissions to previous Allocations Plans)		NA
Does the site continue to next stage?			yes

STAGE 2 ASSESSMENT CONCLUSION

Is the site suitable for the proposed development?

Site to be considered further for assessment.

- **There are no major constraints to development.**
- **Site could form a logical extension to Meppershall and not have an adverse impacts on the settlement pattern.**
- **Mitigation will be required to protect the character of the approach of the village and exposed rural edge to the north,**

STAGE 3 : ACHIEVABILITY

This section assesses whether the site is Achievable in line with NPPG Guidance:

A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site, and the capacity of the developer to complete and let or sell the development over a certain period.

Viability

43	Referring to the Viability Assessment undertaken by consultants, is the probability of the site being viable high, medium or low? <ul style="list-style-type: none"> • High (G) Benchmark land value comfortably exceeded by likely residual value • Low (A) Marginal viability, with likely residual land value close to benchmark land value • Very Low (R) Likely residual value well below benchmark land value 	G	The Council's Residential Development Viability Report (Feb 2017) indicates that residual value of development in this value area and at this scale would exceed both the upper and lower benchmark land values and as such the report indicates that such development would likely be viable.
----	--	---	--

Achievability		
44	<p>Are there any market factors which would affect deliverability?</p>	<p>The Council's Residential Development Viability Report (Feb 2017) is based upon residential property figures between 2013 and 2016. The housing market within Central Bedfordshire has seen significant increases in residential property values in a relatively short period of time, whereby it is considered that the viability of developments within this report has been cautious. For example in 2016 Dunstable has benefited from a 17.9% housing price increase with an average annual house price increase in 2016 for housing within Central Bedfordshire of 10.74%.</p> <p>This increase in property value has been a result of not only national trends in house prices and existing transport links to economically successful areas but also significant infrastructure projects within the pipeline including: East-West Rail; M1-A5 link road; A421 upgrades; Oxford to Cambridge Express Way; Luton and Dunstable Guided Busway; M1 improvements; and potential A1 improvements. It is considered that as such infrastructure projects progress that property prices within the Local Authority will likely continue to increase which has and will increase viability/deliverability of development not only in the higher value areas but also the lower value areas of the Authority.</p>
45	<p>When can the scheme realistically commence delivery?</p> <ul style="list-style-type: none"> • 0 to 5 years (deliverable) • 6 to 10 years • 11 to 15 years • 15 to 20 years • Outside Plan Period 	0-5 years
46	<p>What is the indicative build out time of the site?</p>	<p>The Case Study Sites outlined within the Council's Residential Development Viability Report (Feb 2017) indicates that after the site has received detailed planning permission a single housebuilder would likely take one year to build out this site.</p>
Does the site pass this stage?		Yes

SUMMARY

The sites that pass through this assessment process will not automatically be allocated for development in the Local Plan.

Sites will be selected with reference to a number of other factors including:

- The strategy, vision and objectives proposed in the draft plan
- Technical evidence studies
- The sustainability appraisal process
- The results of public consultation
- Flood Risk Sequential Approach
- Further transport modelling
- Consultation with neighbouring authorities

DRAFT

**Central
Bedfordshire**

A great place to live and work
